

# COME BUILD A STRATEGY FOR SECURING THE WORKFORCE OF TOMORROW

## The Diversity Drought Workshop

Diversity in professional skills, background, age, gender and culture will enhance the water sector's ability to provide robust and innovative solutions for the water wise, liveable cities of tomorrow.

**Wednesday 12th October, 1:30pm - 3:30pm**  
**Room P1, Brisbane Convention Centre**

Trine Stausgaard Munk (Ramboll, Denmark) and Kathryn Sylvester (Sydney Water, Australia) will help you build a strategy for securing the skilled workforce of the future. **The session will be interactive, fun and based on a newly developed board game to secure structured and goal oriented discussions.** The output of the workshop will be summed in quantity and quality to build recommendations for water actors, water sectors, for water ambassadors and for IWA.

Sue Murphy (CEO, Water Corporation) and Diane D'Arras (IWA President Elect) will provide inputs and reflections. **Participants will be key to identifying actions needed for success** and it would be fantastic if you could support us by coming along.
