

POWER OF POSITIVITY

NORDIWA Workshop on the road towards a climate and energy positive Nordic water sector

28th September 2022 – see more and sign up at www.nordiwa.org

The water sector has an important role to play in meeting the global climate goals from the Paris agreement. Currently 30-50% of municipalities' energy consumption is used in the water sector, and in total, the water sector takes up 3% of total electricity in Europe and 4% globally.

The impact of the water sector matters, and our actions matter as well.

With this workshop, we will discuss the ambitions of the water sector in the Nordic countries and pathways of utilities to contribute to this aim.

	Programme
5	Introduction: Workshop purpose and programme by workshop facilitator Miriam Feilberg, Climate change manager, DANVA
10	Keynote: The Danish example and political process towards the climate neutrality in 2030 target by Lars Schrøder, CEO, Aarhus Vand
15	Initial findings from a Nordic climate mitigation project by project consultant Jacob Kragh Andersen, Envidan
